How To Edit PSD File

In order to edit the file, you need to have Adobe Photoshop installed on your system, and the fonts mentioned in the credits installed.

As you can see, the layers are well organized and grouped into folders, which make editing very easy.

Folders with menu actions marked in yellow color. The folders with hover or other actions marked in red color and some of them are hidden.

So, all you have to do, is to select the layer from the right, and then edit it with Adobe Photoshop.

That's all! Enjoy.
